

EXPERIENCE APPROVAL FORM
(AVS 396 – Field Experience in Animal and Veterinary Sciences)

Date _____ Student name _____ Mainstreet ID # _____

Description of proposed experience: _____

Experience details

Name of business: _____ contact info for supervisor / owner

Proposed start and end dates of experience: _____

Number of hours expected during this period: _____

What is your career goal? _____

How will this experience add value to your pursuit of a professional career?

Note that all experiences must be approved by Dr. Martin Stokes **before** the work is started and **after** the student has received advisor approval. The AVS Major requires 320 hours (4 credits) of field experience, which may be split among more than one internship experience (alternatives to AVS 396 are AVS 371 or AVS 397). Each experience must be proposed separately, and must be approved in advance of the start date of the work. During the semester in which the student registers for the 4 credits (or the semester when the final credits are earned), students must submit a daily log of the experience with hours logged and descriptions of work. Students must also submit a 2-3 page essay that describes the work and explains how it affected the student's professional career goals.
