To: Robert Causey <rcausey@maine.edu>

1) Name something you might notice about a cow's living environment?

(air quality, bed cleanliness, feed)

2) Name a disease you could detect by listening to a cow's heartbeat

(hardware)

3) Which side of the cow is the rumen located on?

(left)

4) List 2 symptoms of mastitis

(hot quarter, red quarter, hard quarter, swollen/inflamed quarter, abnormal milk)

5) What does elevated tail carriage mean?

(some sort of uterine discomfort-metritis perhaps)

hope these are ok!
